

The Federal Communications Commission

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! Please reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. This proposal might make my current service unaffordable.

With the flat fee idea you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. So low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume customers. They're making money from their phone use, but I'm not!

I use my wireless phone for emergencies, as I have a daughter with a serious illness. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

Sincerely,

Marion Nauman
